Carole Jackson, MD

Dr. Carole Jackson was born and raised in Nashville, AR. She knew she wanted to go into medicine at an early age, having been inspired by a teacher in elementary school. She also has family members who are in the medical profession. For her, the decision to be an OB-GYN physician is due to the diversity of the practice. She gets to see

patients in the clinic, perform surgery and of course she enjoys delivering babies.

She obtained her undergraduate degree at the University of Arkansas and then completed medical school and residency at UAMS. She has special training in the Da Vinci robot and the MonaLisa Touch laser. She is a member of the American College of OB-GYN, Arkansas Medical Society and the Faulkner County Medical Society.

Dr. Jackson has three grown sons. She spends her spare time cooking, gardening, reading, watching the Hogs and enjoys volunteering with the St. Joseph Christian ladies.

She was chosen as Women's Inc Reader Choice Award, Favorite OB-GYN runner up.

Dr. Carole Jackson is located at the Conway Regional Medical Center location. Call 501.327.9497 to schedule your appointment today.

About Us

At Conway Obstetrics & Gynecology, we focus on providing excellence in women's healthcare and wellness for each and every patient. There are many stages women encounter in relation to their health and well-being, and our team of medical professionals offer support at each of these stages.

Our practice was the first OB/GYN office established in Conway, and we have always incorporated the newest research and best treatment options for each individual patient. We stay on the cutting edge of technology and were the first in Conway to offer Da Vinci robotic surgery, in-office ablations, MonaLisa Touch laser as well as many other procedures.

Our nurse practitioner, Tracy Lamey, has established a great line of communication and trust with our patients. She offers the flexibility of quick work-in appointments.

We have a certified ultrasonographer on staff who is proficient at documenting problems for our patients experiencing pelvic pain or other symptoms. The physicians use these scans to deliver the appropriate care for each patient. Our ultrasound technician also uses our new 4-D ultrasound machine to allow our obstetric patients to see their baby for the first time. These special scans are offered with pictures and a DVD.

We are providers for most major insurance companies and our friendly staff will be glad to assist you with any questions you may have regarding your visit to our office.
